Taking Charge of Change

Prosci®

PEOPLE. CHANGE. RESULTS.™

Five Tenets of Change Management Summary

1. We change for a reason.

Identify the reasons for your change. What are the benefits to the organization and the objectives of the initiative?

2. Organizational change requires individual change.

Identify the specific groups. Who has to change how they do their jobs and how can you address them?

3. Organizational outcomes are the collective result of individual change.

Identify the costs and risks if adoption and usage of the change do not occur as expected:

Estimate the percentage of expected results and outcomes that depend on people changing how they do their jobs?

ADKAR Assessment

For a change you are helping someone through, take a few minutes to do the following:

1. Apply the ADKAR Model

Identify a score for each of the five elements of the ADKAR Model.

2. Identify the barrier point

Identify the first element with a score of three or less. Begin to think through steps you may take to help them overcome this barrier point.

Briefly describe a personal change in behavior you are trying to facilitate with a friend, family member, neighbor or work associate:

List the reasons you believe this change is necessary:

List the factors or consequences (good and bad) for this person that create a desire to change:

List the skills and knowledge needed for the change, both during and after the transition:

Considering the skills and knowledge from above, evaluate the person's ability to perform or act in the new way. Are there any barriers inhibiting the person's ability?

List the reinforcements that will help to retain the change. Are incentives in place to help this person make the change stick? Are there incentives not to change?

KEY LEARNING

The barrier point is the first element of ADKAR that scores a '3' or below.

FOR EACH, RANK ON A SCALE OF 1 TO 5 WITH 1 BEING THE LOWEST

A AWARENESS

Review these reasons and ask yourself the degree to which the person you are trying to change is *aware* of these reasons.

D DESIRE

Consider these motivating factors, including the person's conviction in these areas. Assess the *desire* to change.

K KNOWLEDGE

Rate the person's *knowledge* or training in these areas.

A ABILITY

To what extent does the person have the *ability* to implement the new skills, knowledge and behaviors?

R REINFORCEMENT

To what degree is the person receiving *reinforcement* for demonstrating the change?

ADKAR Profile

To create an ADKAR profile bar graph, mark your score for each element and shade the area below the mark to create each “bar.”

The example on the left is of a profile with A=4, D=5, K=2, A=2, R=1.

Prosci PCT Assessment

Rank each factor on a 1, 2, 3 scale:
1 = Inadequate
2 = Adequate
3 = Exceptional

Project Change Triangle™ Factors

Leadership/Sponsorship Factor Assessment	1, 2, 3
1. The change has a primary sponsor.	
2. The primary sponsor has the necessary authority over the people, processes and systems to authorize and fund the change.	
3. The primary sponsor is willing and able to build a sponsorship coalition for the change, and is able to manage resistance from other managers and supervisors.	
4. The primary sponsor will actively and visibly participate with the project team throughout the entire project.	
5. The primary sponsor will resolve issues and make decisions relating to the project schedule, scope and resources.	
6. The primary sponsor can build awareness of the need for the change (why the change is happening) directly with employees.	
7. The organization has a clearly defined vision and strategy.	
8. This change is aligned with the strategy and vision for the organization.	
9. Priorities have been set and communicated regarding this change and other competing initiatives.	
10. The primary sponsor will visibly reinforce the change and celebrate successes with the team and the organization.	
Score (out of 30):	0

Project Management Factor Assessment	1, 2, 3
1. The change is clearly defined including what the change will look like and who is impacted by the change.	
2. The project has a clearly defined scope.	
3. The project has specific objectives that define success.	
4. Project milestones have been identified and a project schedule has been created.	
5. A project manager has been assigned to manage the project resources and tasks.	
6. A work breakdown structure has been completed and deliverables have been identified.	
7. Resources for the project team have been identified and acquired based on the work breakdown structure.	
8. Periodic meetings are scheduled with the project team to track progress and resolve issues.	
9. The primary sponsor is readily available to work on issues that impact dates, scope or resources.	
10. The project plan has been integrated with the change management plan.	
Score (out of 30):	0

Change Management Factor Assessment	1, 2, 3
1. A structured change management approach is being applied to the project.	
2. An assessment of the change and its impact on the organization has been completed.	
3. An assessment of the organization's readiness for change has been completed.	
4. Anticipated areas of resistance have been identified and special tactics have been developed.	
5. A change management strategy including the necessary sponsorship model and change management team model has been created.	
6. Change management team members have been identified and trained.	
7. An assessment of the strength of the sponsorship coalition has been conducted.	
8. Change management plans including communications, sponsorship, coaching, training and resistance management plans have been created.	
9. Feedback processes have been established to gather information from employees to determine how effectively the change is being adopted.	
10. Resistance to change is managed effectively and change successes are celebrated, both in private and in public.	
Score (out of 30):	0

Score interpretation: Scores of 19 or lower in any section of this assessment mean your project has potential threats and could be in jeopardy. Scores of 20 – 24 mean your project has some risk areas that need to be addressed. Scores of 25 – 30 mean your project is well positioned for success.

19 or lower | 20 – 24 | 25 – 30

Actions to Improve Project Health

For the project, take a few minutes to complete the following:

1. Identify Strengths and Weaknesses

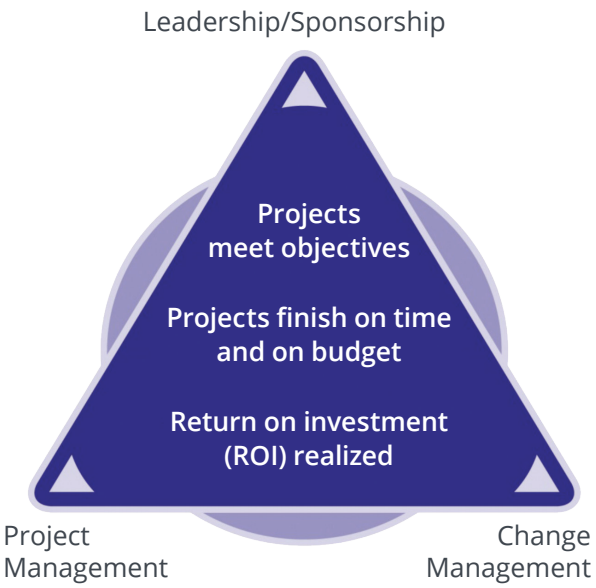
Think through your PCT™ and note the strengths and weaknesses of your project based on the assessment results.

2. Address Key Elements

Note and begin to prioritize key elements you will need to address to improve your project health.

3. Plan for Using the PCT Assessment

Consider how to use the PCT Model and Assessment in your project (i.e., as a baseline, at critical milestones, to build common understanding of change management).



Fill in your strengths and weaknesses for your project below.

Strengths of the Project

What elements are higher than anticipated and how can you leverage them?

Weaknesses of the Project

What elements are lower than anticipated and how can you address them?

Describe your plan for using the PCT Model throughout the lifecycle of your project.

Prosci Risk Assessment

Assessing Change and Organizational Readiness

Change Characteristics Assessment

	Scope of change:				
	Workgroup	Department		Division	Enterprise
	1	2	3	4	5
	Number of impacted employees:				
	Less than 10				Over 1,000
	1	2	3	4	5
	Variation in groups that are impacted:				
	All groups impacted the same				Groups experiencing the change differently
	1	2	3	4	5
	Type of change:				
	Single aspect, simple change				Many aspects, complex change
	1	2	3	4	5
	Degree of process change:				
	No change				100% change
	1	2	3	4	5
	Degree of technology and system change:				
	No change				100% change
	1	2	3	4	5
	Degree of job role change:				
	No change				100% change
	1	2	3	4	5
	Degree of organization restructuring:				
	No change				Radical change
	1	2	3	4	5
	Amount of change overall:				
	Incremental change				Enterprise
	1	2	3	4	5
	Impact on employee compensation:				
	No impact on pay or benefits				Large impact on pay or benefits
	1	2	3	4	5
	Reduction in total staffing levels:				
	No change expected				Significant change expected
	1	2	3	4	5
	Timeframe for change:				
	Very short (< a month) or very long (> a year)				3-month to 12-month initiative
	1	2	3	4	5
	Sum of points for Change Characteristics Assessment (out of 60):				0

A score of 35 or higher indicates a large, disruptive change that will require more change management for the project to be successful.

Prosci Risk Assessment (continued)

Organizational Attributes Assessment

	Perceived need for change among employees and managers:				
	Compelling business need for change is visible – employees are dissatisfied with the current state				Employees do not view change as necessary – employees are satisfied with the current state
	1	2	3	4	5
	Impact of past changes on employees:				
	Employees perceive past changes as positive				Employees perceive past changes as negative
	1	2	3	4	5
	Change capacity:				
	Very few changes underway				Everything is changing
	1	2	3	4	5
	Past changes:				
	Changes were successful and well-managed				Many failed projects and changes were poorly managed
	1	2	3	4	5
	Shared vision and direction for the organization:				
	Widely shared and unified vision				Many different directions and shifting priorities
	1	2	3	4	5
	Resources and funding availability:				
	Adequate resources and funds are available				Resources and funds are limited
	1	2	3	4	5
	Organization's culture and responsiveness to change:				
	Open and receptive to new ideas and change				Closed and resistant to new ideas and change
	1	2	3	4	5
	Organizational reinforcement:				
	Employees are rewarded for risk taking and embracing change				Employees are rewarded for consistency and predictability
	1	2	3	4	5
	Leadership style and power distribution:				
	Centralized				Distributed
	1	2	3	4	5
	Executive/senior management change competency:				
	Business leaders demonstrate effective sponsorship on change projects				Business leaders lack sponsor skills and knowledge
	1	2	3	4	5
	Middle management change competency:				
	Managers are highly competent at managing change				Managers lack the knowledge and skills for managing change
	1	2	3	4	5
	Employee change competency:				
	Employees are highly competent at managing change				Employees lack the knowledge and skills for managing change
	1	2	3	4	5
	Sum of points for Organizational Attributes Assessment (out of 60):				0

A score of 35 or higher indicates a change resistant organization that will require more change management for the project to be successful.
